Data provider wants a dataset to be considered as CARD4L.

LSI-VC SEC monitors the process and keeps a registry of proposals.

LSI-VC SEC connects data provider with a product-specific LSI POC.

Data provider self-assesses their product using PFS document.

The LSI POC interacts with data provider and WGCV.

LSI POC approves the review and confirms the CARD4L level.

WGCV provides a peer review.

LSI-VC SEC adds the dataset/access instructions to the CARD4L webpage.
