During its 2016-2017 CEOS SIT Chair term, ESA seeks to:

- Ensure the successful advancement of ongoing CEOS commitments and deliverables, identifying and addressing issues and obstacles impacting each priority initiative;
- Ensure full access to, and exploitation of Copernicus Sentinel data;
- Further develop, with the joint CEOS-CGMS WGClimate and through GCOS, the relationships with IPCC and UNFCCC required to support observation of climate indicators in support of the Paris Agreement;
- Maintain and improve effectiveness of our strategic partnerships, including with UN agencies, Development Banks, international programmes and agencies; the effective functioning of GEO, and CEOS within it, is a high priority in this; and,
- Support for the initiatives proposed by the CEOS Chairs in 2016 and 2017.

To inform and drive towards outcomes from its two-year term, the SIT Chair Team proposes that the SIT-32 agenda assess the status and directions of these themes, taking into account developments over the past year. The continued implementation of the Copernicus program, as well as the ongoing activities of existing and new CEOS data users has affirmed that the role of government-sponsored civil Earth observation (EO) programmes has changed significantly since the establishment of CEOS in 1984. The pace of change appears likely to accelerate in the future, and this will change the nature of what space agencies require of CEOS. CEOS Principals/Designees are asked to come prepared to discuss the following topics and questions under the SIT Chair themes:

**Strategic Partnerships**

- Review the CEOS and space agency experience linked to development banks and UN agencies, which are often central to international coordination of governments in domains that are emerging as priorities for government EO programmes. The context can be complex and varies by topic/agency. Can CEOS, and/or GEO, establish more strategic and high-level modus operandi for productive partnerships in these areas?
- The scope of the CEOS-GEO relationship and how CEOS can both complement and leverage the strengths of GEO. SIT-32 will reflect on the ongoing changes in GEO strategic priorities, governance and structure, and report CEOS progress in influencing and supporting the GEO 2016-2025 Framework.
- Address the three strategic priorities endorsed by the GEO-XIII Plenary: 2030 Agenda for Sustainable Development, Climate Change – Greenhouse Gas Monitoring (Paris Agreement), and Disaster Risk Reduction (Sendai Framework), while noting the CEOS-GCOS-UNFCCC collaboration discussed below.
Success of Ongoing CEOS Business

- How should CEOS deal with new and evolving requirements coming from GEO or other quarters? For example, in relation to the coordination of observations of the Water Cycle (GEOGLOWS), Carbon Cycle, forest and agriculture, oceans, and in support of the UN Sustainable Development Goals.
- What is the role of LSI-VC in the coordination of land-based observations, including stewardship of the processes within CEOS that might provide a more structured approach to implementing and managing multiple sets of requirements and observing assets?
- Specific requests of SIT from the existing CEOS priorities GFOI and GEOGLAM - to help address strategic obstacles and opportunities for success.
- Coordination potential and requirements for additional topics, for example polar sea ice and atmospheric carbon.

CEOS Climate Observations

- Assessment of the implications and opportunities arising from the Paris Agreement, and follow-up at COP-22, and the necessary evolution of the key relationships: CEOS-GCOS-UNFCCC.
- Report on the next phase of the CEOS-GCOS documentation and the Essential Climate Variable (ECV) inventory and Climate Architecture.
- Progress towards the VC and WG activities in support of the CEOS Carbon Strategy.
- Discuss the latest need for coordination to replace the work of the under-resourced GTOS.
- Establishment of climate indicators

Copernicus Sentinel Data Uptake

- Report on the latest ground and space infrastructure developments and update on any access and exploitation issues raised at SIT-31.

Future Data Access and Analysis Architectures

- Progressing the agenda of the Ad-hoc team continued in 2017 and ensuring the necessary high level support from CEOS and its agencies
- Report on the progress, including the generation of analysis ready data in support of specific CEOS projects

2017 Initiatives

- Further develop the CEOS support strategy for the UN Sustainable Development Goals (UN SDG); report on the CEOS Chair Interoperability initiative; and follow-up on the CEOS Information Systems Survey.

Some of these topics and questions can be answered in short order, whilst others will require long term attention and effort – to the end of the SIT Chair Term and beyond. SIT-32 will contribute to these next steps, and that the dialogue will continue across the 2017 SIT Technical Workshop, the 2017 CEOS Plenary, and onto the NOAA SIT Chair term in 2018-2019.
**Security Information:**

Participants in the SIT-32 and side meetings will be required each day to present a valid identification document (e.g. passport) at the ESA Security Office (located at the entrance of ESA HQ) to receive a magnetic badge. Visitors are requested to wear their magnetic badge in a visible location while inside the ESA HQ building.

**Side Meeting Schedule**

In addition, room B301 (3rd floor) will be available to the CEOS participants as a working room, on 26 and 27 April, and room B0154 (1st floor) on 25 April. Please contact Carmen if you wish to book that room for a specific time slot.
SIT-32 Social events:

Welcome Cocktail (25 April): ESA Headquarters, from 18:00 to 19:00.

Host Dinner (26 April):
Immediately after the meeting, there will be a guided tour of Mona Bismarck American Centre, followed by a hosted dinner. The tour will start at 19:00 (7 pm).

The Mona Bismarck American Centre is located 34 Avenue de New York, near the Jardins du Trocadero

It is a nice 2.3 km (1.4 mile) walk from ESA HQ. Otherwise, you may take the underground ("metro" in French) at the Cambronne station (line 6, direction Charles de Gaulle Etoile), get out at the Trocadero station and then walk 750 m (0.5 mile).

Transport/Directions:

The SIT-32 meeting and preceding side-meetings will be held at ESA Headquarters (Paris, France) located in the area of the Eiffel Tower.

European Space Agency Headquarters
8-10 Mario Nikis
75015 Paris

Phone: + 33 (0)1 53 69 77 12
ESA web site: www.esa.int

Nearest Metro (Underground) stations: Line 6 'Cambronne' or Line 10 'Segur'

A map can be found in appendix.
**Wednesday 26th April – SIT-32 Day 1**

*Security Information:* See Above.

*Day 1 WebEx:* See Appendix.

Session: Thematic Observing Strategies

*Strategic consideration of emergence and status within CEOS of the many acquisition requests and reflection on CEOS capacity and ability to manage multiple parallel requirements. What thematic coverage has CEOS committed to? What are the current and future resource requirements to address those commitments and the adequacy of CEOS resources? Does CEOS capacity allow it to take on new commitments?*
