

- CEOS leadership wants to standardize the naming convention of the virtual constellations as: xxx-VC
 - Old: Atmospheric Composition Constellation = ACC
 - New: Atmospheric Composition Virtual Constellation = AC-VC
- David Crisp (NASA JPL) will lead our GHG subgroup
 - Focus on a subset of the 6 “Carbon Actions” AGG AC-VC inherited last year
- Each AGG AC-VC subgroup now has 1 “Deliverable” for which we report annual progress to CEOS leadership

#	Title	Compl. Date	Description
VC-02	Total ozone dataset validation and harmonization	2017-Q4	Production of peer-reviewed papers on nadir profile intercomparisons and of long term (1979-now) combined total ozone data sets
VC-03	Air quality constellation coordination	2017-Q2	Prepare document on calibration needs for the AQ Constellation
VC-05	Greenhouse gas constellation coordination	2018-Q3	White paper on coordinated detailed planning/preparation of a constellation of instruments to measure CO ₂ and CH ₄ from space
