

# Report on CEOS WGCV SAR Subgroup Activities

CEOS WGCV 38<sup>th</sup> Plenary

NOAA Center for Weather and Climate Prediction  
College Park, MD, USA  
October 2<sup>nd</sup>, 2014

M. Zink

Chair CEOS WGCV SAR Subgroup  
German Aerospace Center (DLR)  
manfred.zink@dlr.de

<http://sarcv.ceos.org>

# EUSAR 2014

10<sup>th</sup> European Conference  
on Synthetic Aperture Radar

02-06 June 2014  
Maritim Hotel, Berlin

Organized by  
**ITG/VDE**

**AIRBUS**  
DEFENCE & SPACE

**Fraunhofer**  
FHR

Technically sponsored by

EUREL • URSI • DGON • IEEE GRSS • IEEE AESS

[www.eusar.de](http://www.eusar.de)

combined with the  
**21<sup>st</sup> CEOS SAR Calibration and Validation Workshop**

- 530 participants from 37 countries
- 250 oral & 135 poster presentations

# EUSAR 2014

Berlin 03-05 June 2014

**ITG VDE**

**AIRBUS**  
DEFENCE & SPACE

**Fraunhofer**  
FHR

# CEOS SAR CAL/VAL Workshop 2014

- As part of the EUSAR conference:
  - 3 Calibration sessions
  - Poster session: Calibration & Validation
  - RADARSAT-2 & RCM session
  - TerraSAR-X & TanDEM-X sessions
  - Wave Propagation sessions
- Dedicated CEOS session on 06-June:
  - Summary of cal/val sessions
  - Test sites & targets (CEOS Work Plan Action CV-2: Website for SAR calibration sites and targets)
  - QA4EO (traceability of calibration requirements)

# Highlight of EUSAR / CEOS SAR WS

Sentinel-1A

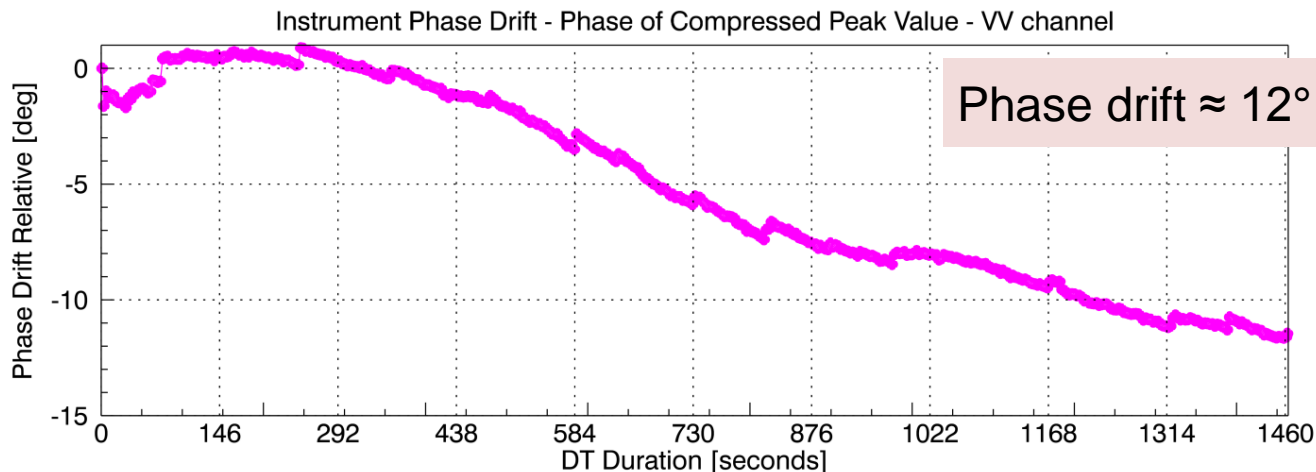

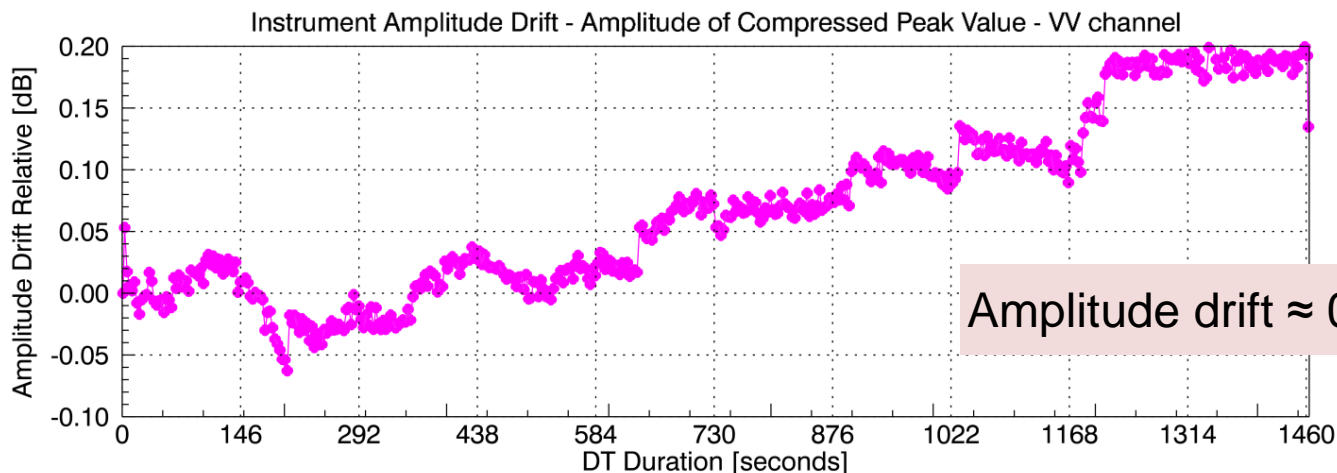

ALOS-2

# S-1A Instrument Drift for Long EW (VV)

- EW mode
- VV channel
- Duration = 24.39 min
- Date = 13.04.2014

- ✓ Instrument drift compensation
- ✓ Instrument very stable over long time (aprox. 24 min)

# Etna, Sicily: Sentinel-1A TOPS Mode Interferogram

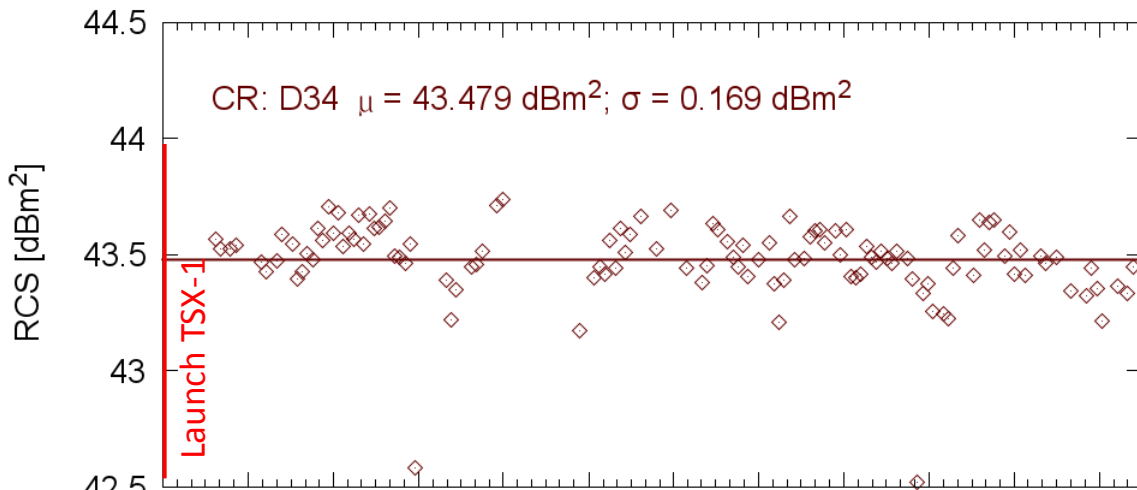

# ALOS-2: Deforestation in the Amazon

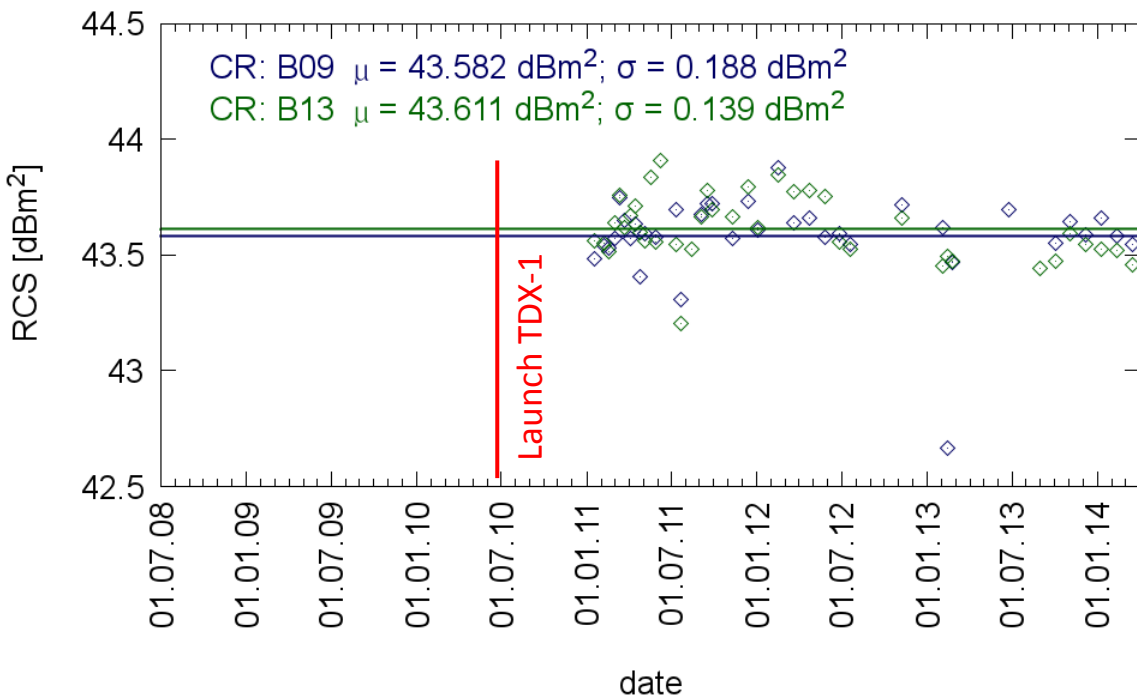

# Point Target Analysis – Radiometric Stability

LTSM TSX-1  
7 years

LTSM TDX-1  
4 years

The standard deviation over life time of the target RCSs is a measure for the radiometric stability of both systems (TSX / TDX)!

High radiometric stability  
**< 0.2 dB**  
for both satellites  
over monitored period  
(Req.: 0.5 dB  
over 6 month)

# Current Efforts of the SAR Subgroup

- Precise transponder development & absolute radiometric calibration
- Characterisation of rain forest ongoing
- Investigation of propagation effects especially through the ionosphere
- Calibration of compact polarimetry (transmit circular and receive horizontal & vertical polarizations)

# CEOS SAR CAL/VAL Workshop 2015

- Intensive discussion in dedicated CEOS sessions at ASAR 2013 and EUSAR 2014
- One full day too short
- 22<sup>nd</sup> CEOS SAR CAL/VAL WS as a standalone event
- Host/location tbd
