# The Role of Carbon Finance for Sustainable Landscapes: The World Bank Group's Forest Funds

Alexander Lotsch  
Senior Carbon Finance Specialist  
March 3, 2015  
GFOI Meetings (via Webex)

# The Key Point

- **The World Bank's landscape and funds are among the few that provide major climate finance for REDD+**
  - **Governments lead on REDD+ program development**
  - **We provide finance and facilitate technical assistance**
- **Our funds' standards on REDD+ are instrumental to pilot REDD+ at scale**
  - **Provide proof-of-concept for REDD+ and generate early finance streams (at scale)**
  - **Help countries to achieve long-term goals under UNFCCC**
- **Our work relies on and interfaces with many other technical and financial partners (like the GFOI)**

# Humbo, Ethiopia

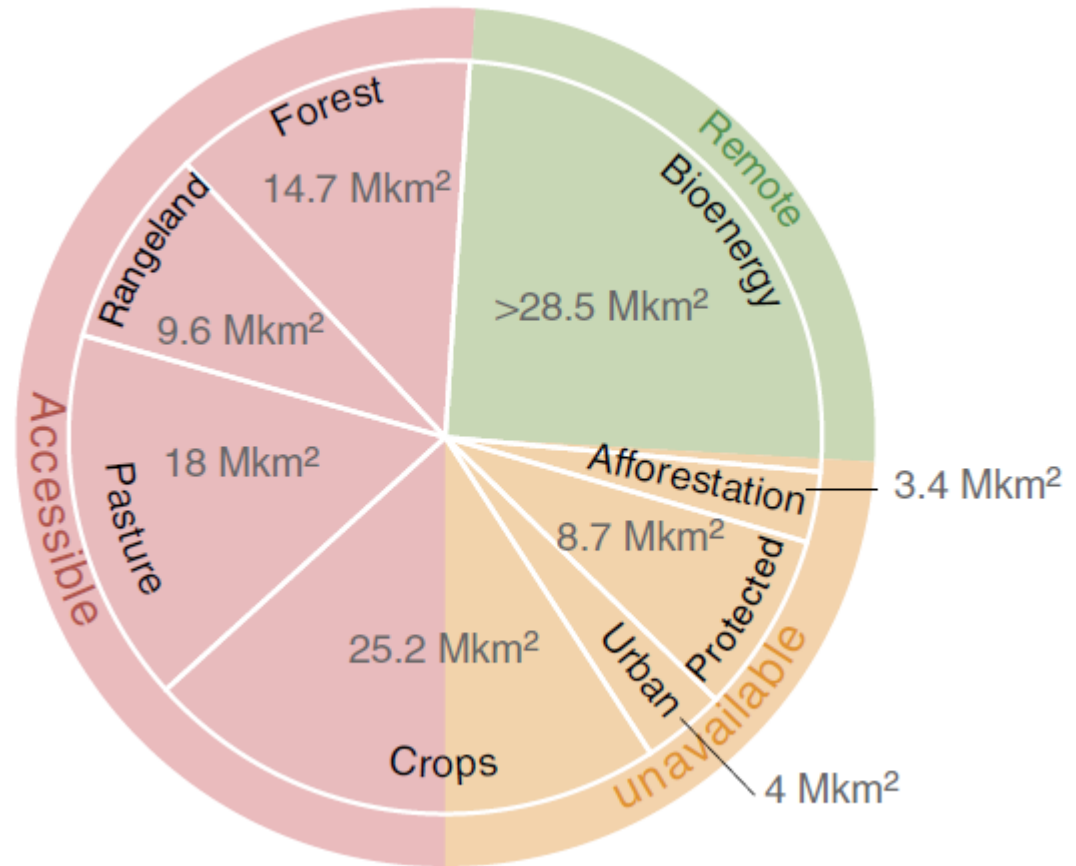

2004

Today

# LAND REQUIREMENTS FROM DIFFERENT SECTORS ARE MULTIPLE, LARGE AND COMPETING

High land demand scenario for 2050

# TRANSFORMING LANDSCAPES REQUIRES INNOVATIVE *WAYS TO ...*

## ENGAGE PEOPLE

## HARNESS TECHNOLOGY

## LEVERAGE FINANCE

# THE CHALLENGE WE ADDRESS:

**TO PROMOTE RURAL DEVELOPMENT IN A CLIMATE-SMART WAY**

## CLIMATE CHANGE:

**1/4 of global greenhouse gas emissions** come from deforestation, unsustainable agricultural practices and land-use.

**Agriculture is the main driver of deforestation worldwide.**

Reverse emission trends: Land can be a carbon sink if managed well.

## RURAL POVERTY:

**75% of the world's poor are rural and depend on healthy landscapes for their livelihoods, food security, and development opportunities.**

Reverse land degradation trends: alleviate poverty and share prosperity.

# Forests and Landscapes Climate Finance (CCGFL)

## Working toward climate smart landscapes

*“Transforming land, lives, and the way we do business.”*

- **\$1.2 billion of carbon finance for forests and landscape transformation**
- **Pioneering new incentive mechanism:** Results-based finance for emission reductions at the landscape level
- **Working across Sectors:** Environment, Agriculture, Energy & Extractives
- **Global reach:** Operations in 54 countries and in 5 regions
- **Fostering public-private sector partnerships:** Collaboration with IFC (World Bank private sector arm) and commodity corporates at global and local level

# OUR FUNDS (\$1.2 BILLION)

## Forest Carbon Partnership Facility (since 2008) \$825M

## Initiative for Sustainable Forest Landscapes (ISFL)(2013) \$300M

## BioCF Tranche 1 & 2 (CDM and voluntary markets) (2004) \$90M

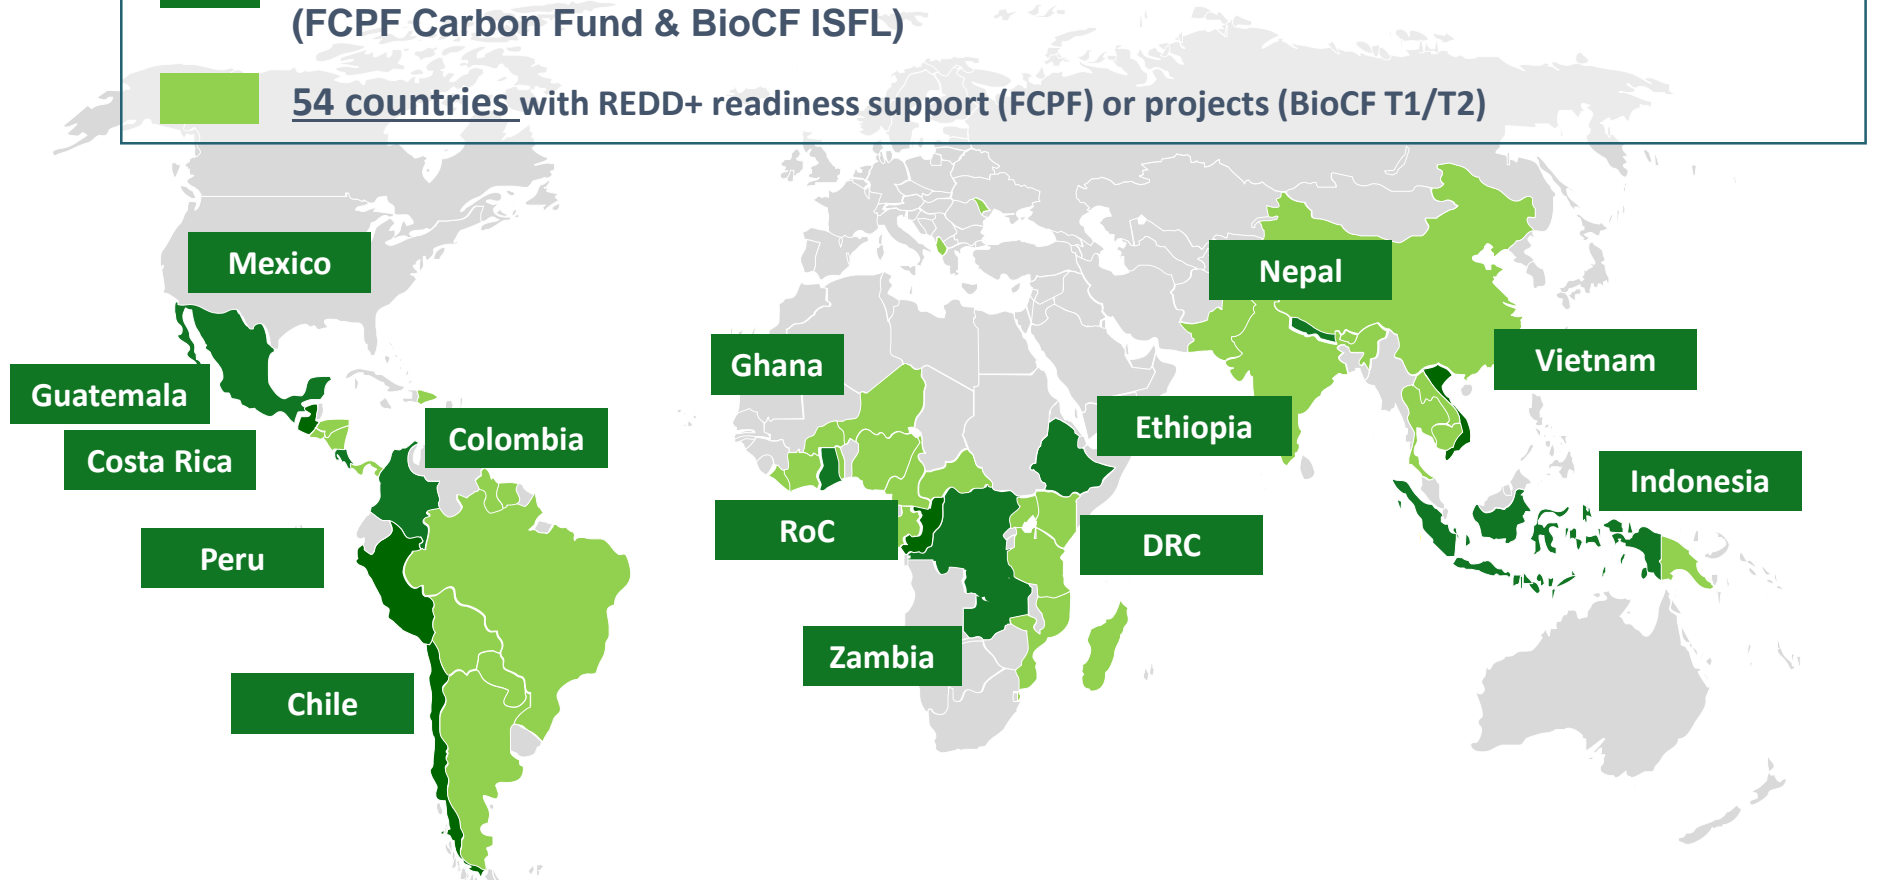

# SCALING-UP OUR PROGRAMS:

# Where we work:

 **14 countries** with large scale climate-smart land-use programs under development (FCPF Carbon Fund & BioCF ISFL)

 **54 countries** with REDD+ readiness support (FCPF) or projects (BioCF T1/T2)

*Together these programs will slow tropical deforestation and forest degradation in an area equivalent to the size of France, and cut the equivalent of one year of greenhouse gas emissions from roughly 20 coal-fired power plants.*

# Key Features of Carbon Fund REDD+ Programs

	Costa Rica	Mexico	Ghana	DRC	Nepal	Chile	Rep. of Congo	Vietnam	Guatemala	Peru	Indonesia
Accounting Area [million ha, % of country]	4.1 (80%)	17.7 (9%)	5.9 (25%)	12.3 (5%)	2.3 (15%)	16.5 (22%)	12.4 (36%)	5.1 (16%)	10.9 (100%)	15.6 (12%)	12.5 (9%)
Forest Area in Accounting Area [million ha, % of Accounting Area]	n/a	17.7 (100%)	4.6 (77%)	9.8 (80%)	1.2 (52%)	8.4 (51%)	12 (97%)	2.3 (45%)	3.7 (34%)	13.1 (84%)	4.2 (34%)
Average Annual Emissions during Reference Period [million tCO <sub>2</sub> e/yr]	-4.7 <sup>1</sup> (10.6-15.3)	6.2	28.5	23.9	4.4	9.4	6.2	.7 <sup>1</sup> (16-15.3)	11.5	17.6	60.7
HFLD Adjustment [million tCO <sub>2</sub> e/yr]	n/a	n/a	n/a	6.0	n/a	n/a	5.1	n/a	n/a	3.1	n/a
Estimated Program ER 2016-2020 (5 years) [million tCO <sub>2</sub> e]	14.7 <sup>2,4</sup>	8.7	18.5	34.2 <sup>2</sup>	14.0	7.5	11.7 <sup>3</sup>	20.6 <sup>2</sup>	21	20.7 <sup>3,4</sup>	53.4 <sup>4</sup>
Estimated/assumed Program Effectiveness	11%	28%	13%	29%	64%	16%	37%	13%	37%	20%	28%

1 Emissions minus Removals

2 ERs from reduced emissions plus enhanced removals

3 Includes adjustment for High Forest Low Deforestation (per Methodological Framework)

4 Adjusted from ER-PIN to align with 5 year program period

# Our work across sectors:

To achieve climate-smart land use, protect forests, restore degraded land, and improve local livelihoods, we need action across sectors. Example actions include:

**Agriculture:** Decouple deforestation from agriculture commodity growth

**Energy:** Improve the fuelwood/charcoal value chain

**Transport:** Plan to minimize environmental impact

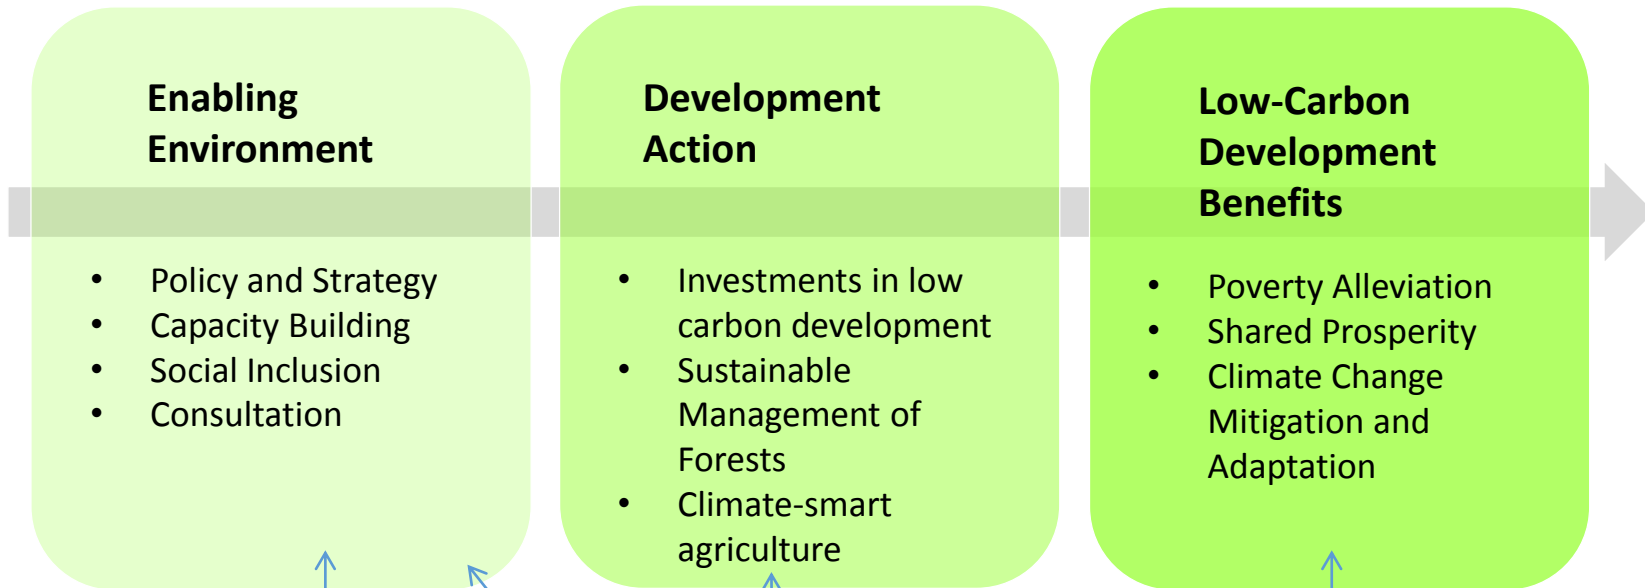

**Land:** Invest in land use planning, address land tenure issues

**Mining:** Set “high” environmental management standards

**Forestry:** Governance, Sustainable Forest Management, Community Forestry

# Our Business Model:

We provide:

**Grant Funding;  
Technical Assistance**

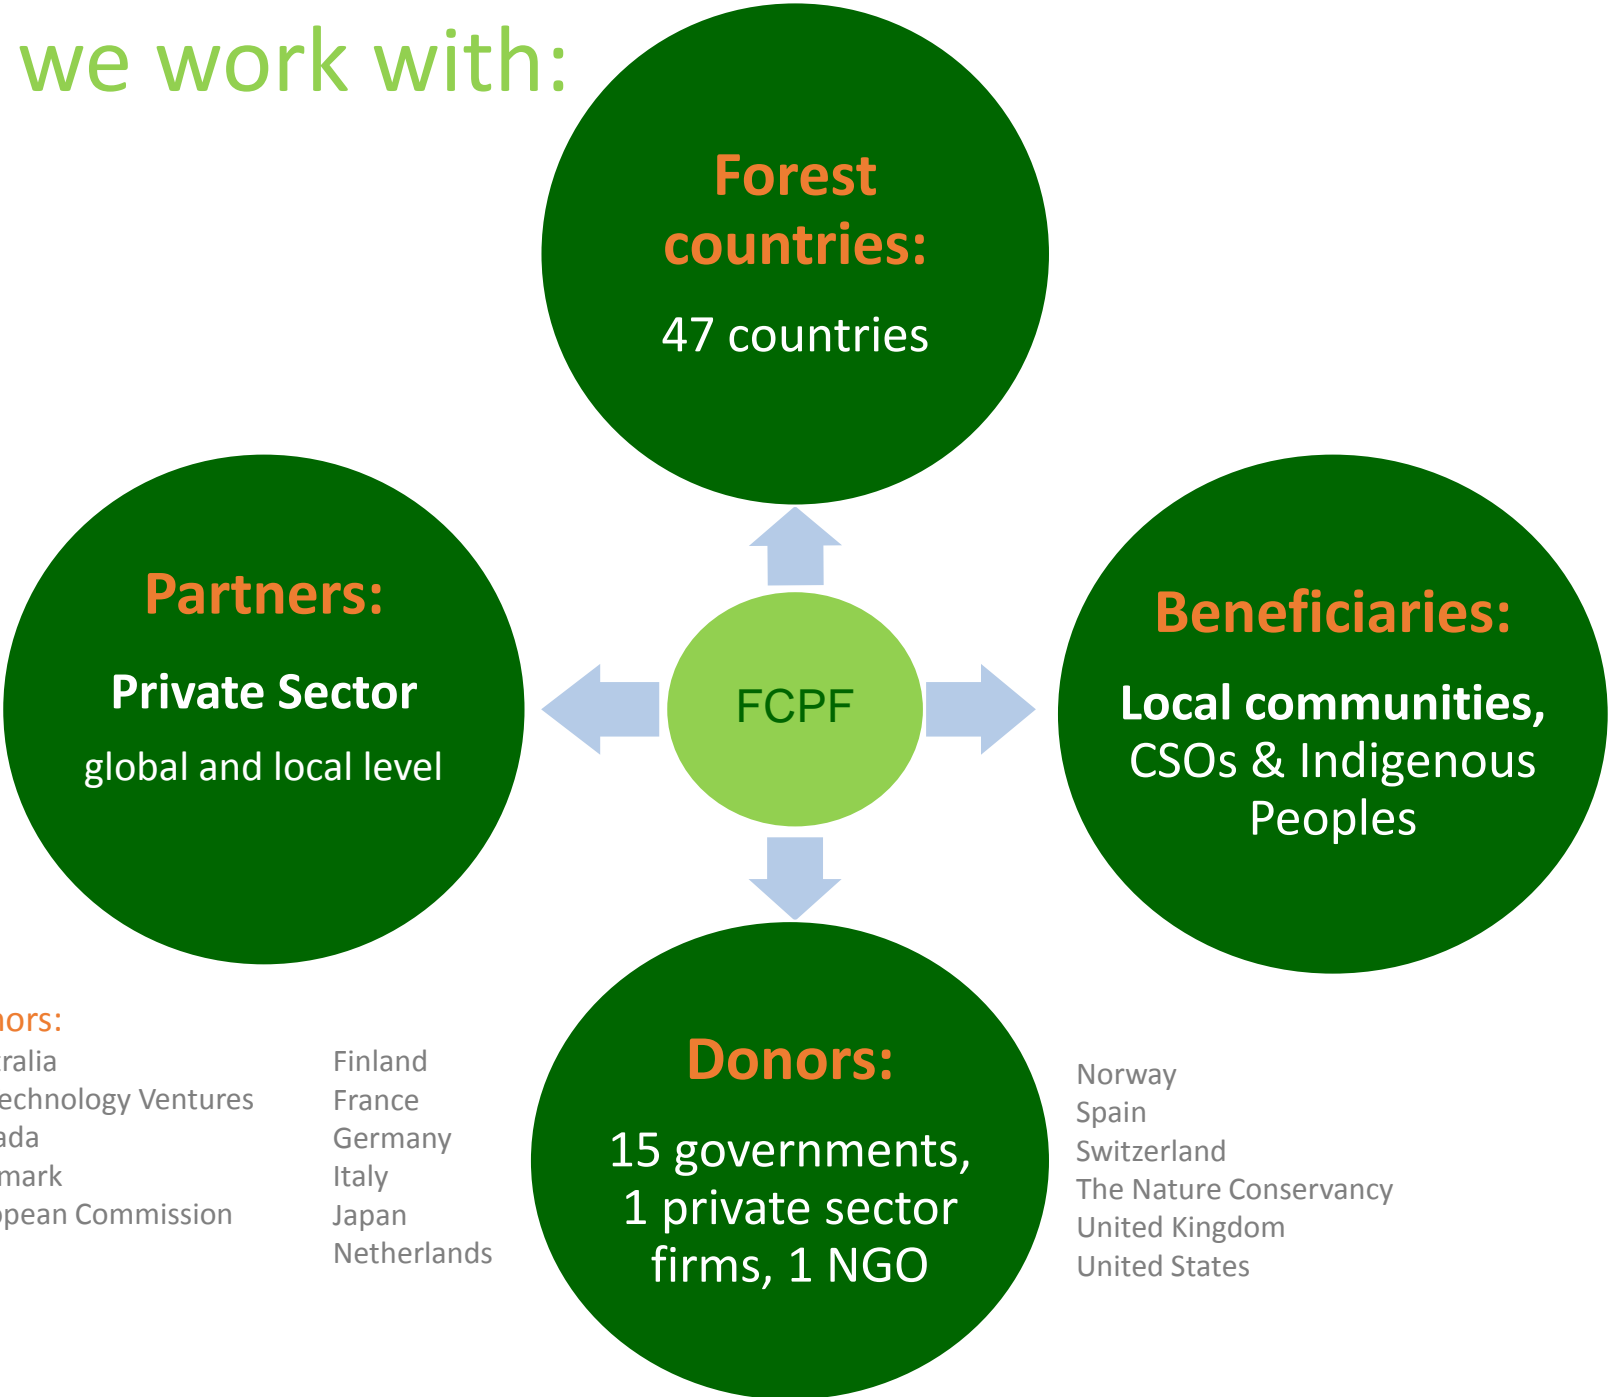

**Results-Based Finance for  
Emission Reductions**

We “crowd-in”:

Private and Public Finance (including IDA, IBRD, FIP, GEF financing)

# Who we work with:

# Tools

# Technical Guidance

# The REDD+ Decision Support Toolbox

Online tool with a simple interface, supported by a comprehensive database, that

- **Informs** the technical approach for reference levels (RL), forest monitoring, and measurement reporting and verification (MRV)
- **Facilitates** technical and policy decisions related to RL and MRV
- **Integrates** a range of variables required for estimation emissions

# STANDARDS WE HAVE DEVELOPED TO PILOT REDD+

## REDD+ READINESS ASSESSMENT FRAMEWORK

## CARBON FUND METHODOLOGICAL FRAMEWORK

## GENERAL CONDITIONS FOR EMISSION REDUCTION PAYMENT AGREEMENTS

# SOME FEATURES OF THE CARBON FUND METHODOLOGICAL FRAMEWORK

- Account for emissions from degradation (if significant)
- Provide consistency in reference level emissions (historical) and MRV'ed emissions (during program implementation)
- Quantify uncertainty in emission reduction estimates
- Track leakage (displacement of emissions) and reversals

## **How the GFOI can help countries (even more) to advance on REDD+**

- **Become more integral to national REDD+ process**
- **Coordinate on capacity building and guidance materials**
- **Help make forest monitoring become a routine and sustainable operational task in REDD countries**

**WORLD BANK GROUP**  
Climate Change

THANK YOU
