GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

Introduction

February 2017

- 17 Goals, 169 Targets, 230 Indicators = Huge Data Needs

2

GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

The Challenge:

- Data on entire groups and key issues are unavailable.

- Data are not dynamic or disaggregated.

- Data that exist are often not accessible or open.

- Data that are accessible are often not used effectively.

DATA CHALLENGES LEAVE TOO MANY BEHIND

GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

The Opportunity: the Data Revolution

Data Revolution for Bold Action

- Government Generated Data
- Geospatial & Earth Observation
- Citizen Generated Data
- Private Sector "Big" Data
- Admin & Financial Data

Disaggregated, Real-time, Dynamic, Open, Usable, Actionable

- New data sources
- Faster production of data
- Ease of analyzing data
- Advocacy for data openness
- Advocacy for data use

GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

Realising that opportunity through collaboration

An open, independent, multi-stakeholder network of 200+ data champions, including major stakeholders as well as unusual suspects

Members represent the full range of data producers, organizers and users who are critical to harnessing the data revolution for sustainable development

The Partnership's objective is for all stakeholders in every country to have the right data at the right time to achieve the Sustainable Development Goals

GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

The Global Partnership has 200+ Data Champions

GLOBAL PARTNERSHIP
FOR SUSTAINABLE DEVELOPMENT DATA

WHAT DOES THE GLOBAL PARTNERSHIP DO?

CONNECT

We will bring partners together in ways that encourage the development of new working relationships, giving rise to initiatives that would not have happened in the absence of the GPSDD

CATALYZE

We will catalyse, develop and invest in collaborations between our partners that solve specific problems in the data ecosystem, improving the production and use of data for sustainable development

POLITICAL CHANGE

We will advocate for the critical importance of data as a part of the infrastructure for a better world, and we will advocate for the removal of barriers to improvements in the production and use of data for sustainable development.

Earth observations

Environmental data a priority for GPSDD in 2017

- Bringing data together
- Bringing institutions together
- Reducing barriers to collaboration
