

## Agenda v1.0

# Workshop on EC CEOS Priority on GHG Monitoring: Interfaces Between CEOS Agencies and the GHG Monitoring System

18-19 June 2018

European Commission Joint Research Centre, Ispra, Italy  
JRC Visitors Centre

To make the most of GHG data from space, we need to be fully aware of how it integrates with the other key components of the GHG monitoring system (i.e., modelling, in situ, and inventory aspects) – especially as we move to an operational context.

This workshop will be focused on the space agency perspective, and seeks to understand the best practices for the integration of space data with the rest of the GHG monitoring system by drawing on the individual experiences of CEOS agencies to date.
