

Data Democracy

Pakorn Apaphant (GISTDA)

Draft v0.1

GISTDA activities

- Designing Data Democracy Portal
- Organizing Data Democracy Workshop

Data Democracy Workshop

Data Democracy Workshop

- Program Name:
“Data Democracy Workshop on Climate Change”
- Date: 7-11 June 2010
- Location: GISTDA headquarters, Bangkok
- Targeting Participants: ASEAN (climate relevant)
approximate 30 people
- Expecting Speakers: CEOS (and local experts) as proper

Progress

- GISTDA, a local host, sent an official letter to CEOS Chair asking for CEOS support on lecturers or speakers on 16 February.
- An official invitation letter to invite climate relevant officers around 20 agencies in ASEAN member list (10 countries) on the end of March.
 - Brunei Darussalam
 - Cambodia
 - Indonesia
 - Lao PDR
 - Malaysia
 - Myanmar
 - Philippines
 - Singapore
 - Thailand
 - Vietnam
- Pending on confirmation of potential speakers' name, especially CEOS speakers (expecting from JAXA, ESA, INPE, ISRO, and CMA).

Tentative Agenda

Time	Subject	Speaker/Lecturer
7 June 2010		
9:30-10:30	Introduction to Data Democracy Program	Dr.Pakorn Apaphant (GISTDA)
10:30-12:00	Climate Change and its effects in Asia	Dr.Anond Snidvongs (GISTDA)
12:00-13:00	Lunch Break	
13:00-16:00	EO for Climate Change	TBC
8 June 2010		
9:00-12:00	Modeling and Data Application for Climate Change	TBC
12:00-13:00	Lunch Break	
13:00-14:00	GEONETCast and FENGYUNCast System	Mr. Wang Chunfang (CMA)
14:00-16:00	Introduction to Data Democracy Portal Contents - Data Access - Software Tools	TBC (GISTDA)
9 June 2010		
9:00-12:00	Software Implementation (Hands-on Training)	TBC
12:00-13:00	Lunch Break	
13:00-16:00	Software Implementation (Hands-on Training)	TBC
10 June 2010		
9:00-12:00	Case Studies (Hands-on Training)	TBC
12:00-13:00	Lunch Break	
13:00-16:00	Case Studies (Hands-on Training)	TBC
16:00-16:30	Workshop Closing & Evaluation	TBC
11 June 2010		
9:00-15:00	Facilities Visit	

Require speakers on these following topics:

- EO for Climate Change
- Modeling and Data Application for Climate Change
- Software Implementation (Hands-on Training) - *2 sections*
- Case Studies (Hands-on Training)

Support from CEOS community will be very advantage for ASEAN people in order to update and learn about new technology of EO.

Data Democracy Portal

2008

- Dataset

= 4 datasets from different providers

- Training Document

= 2 courses from providers

- Freeware

= 2 software from providers

2009

- Dataset

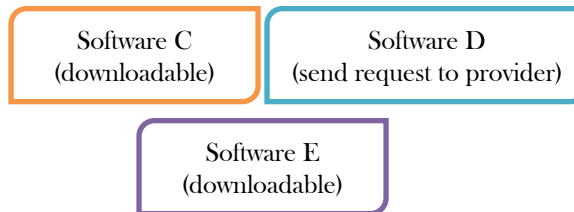

= 2 datasets from different providers

- Training Document

= 1 course from provider

- Freeware

= 3 software from providers

2010

- Dataset

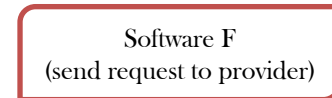

= 2 datasets from different providers

- Training Document

= 1 course from provider

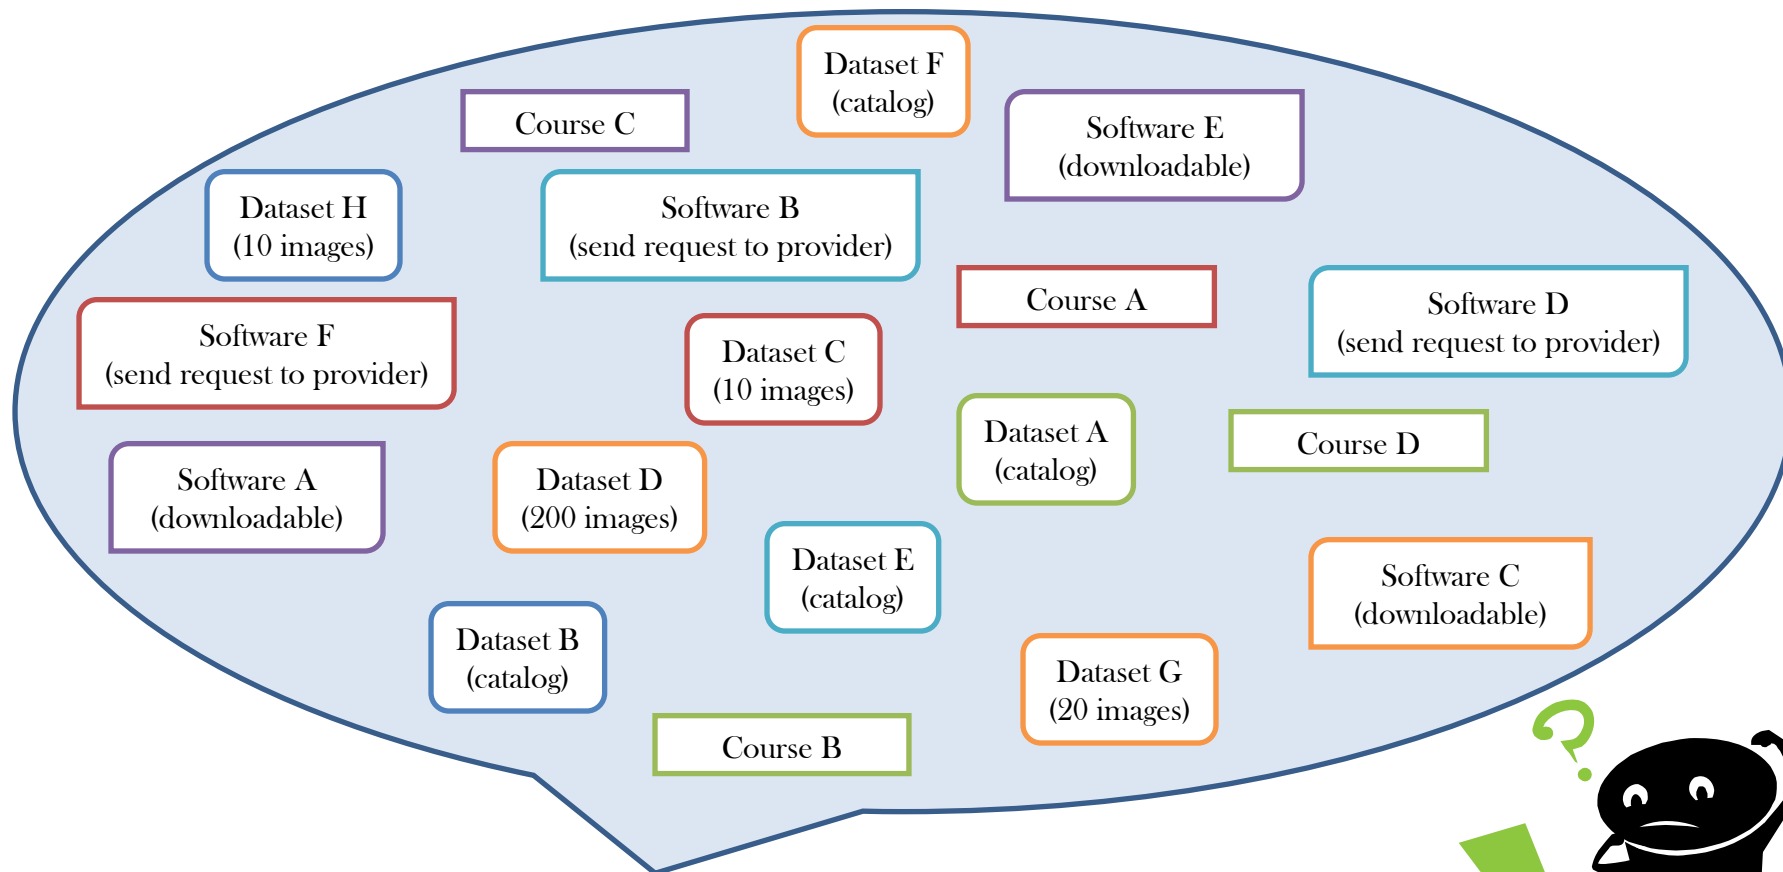

- Freeware

= 1 software from provider

2010 (at this moment)

- All products are available but hard to find!

= a bunch of products out there from different providers

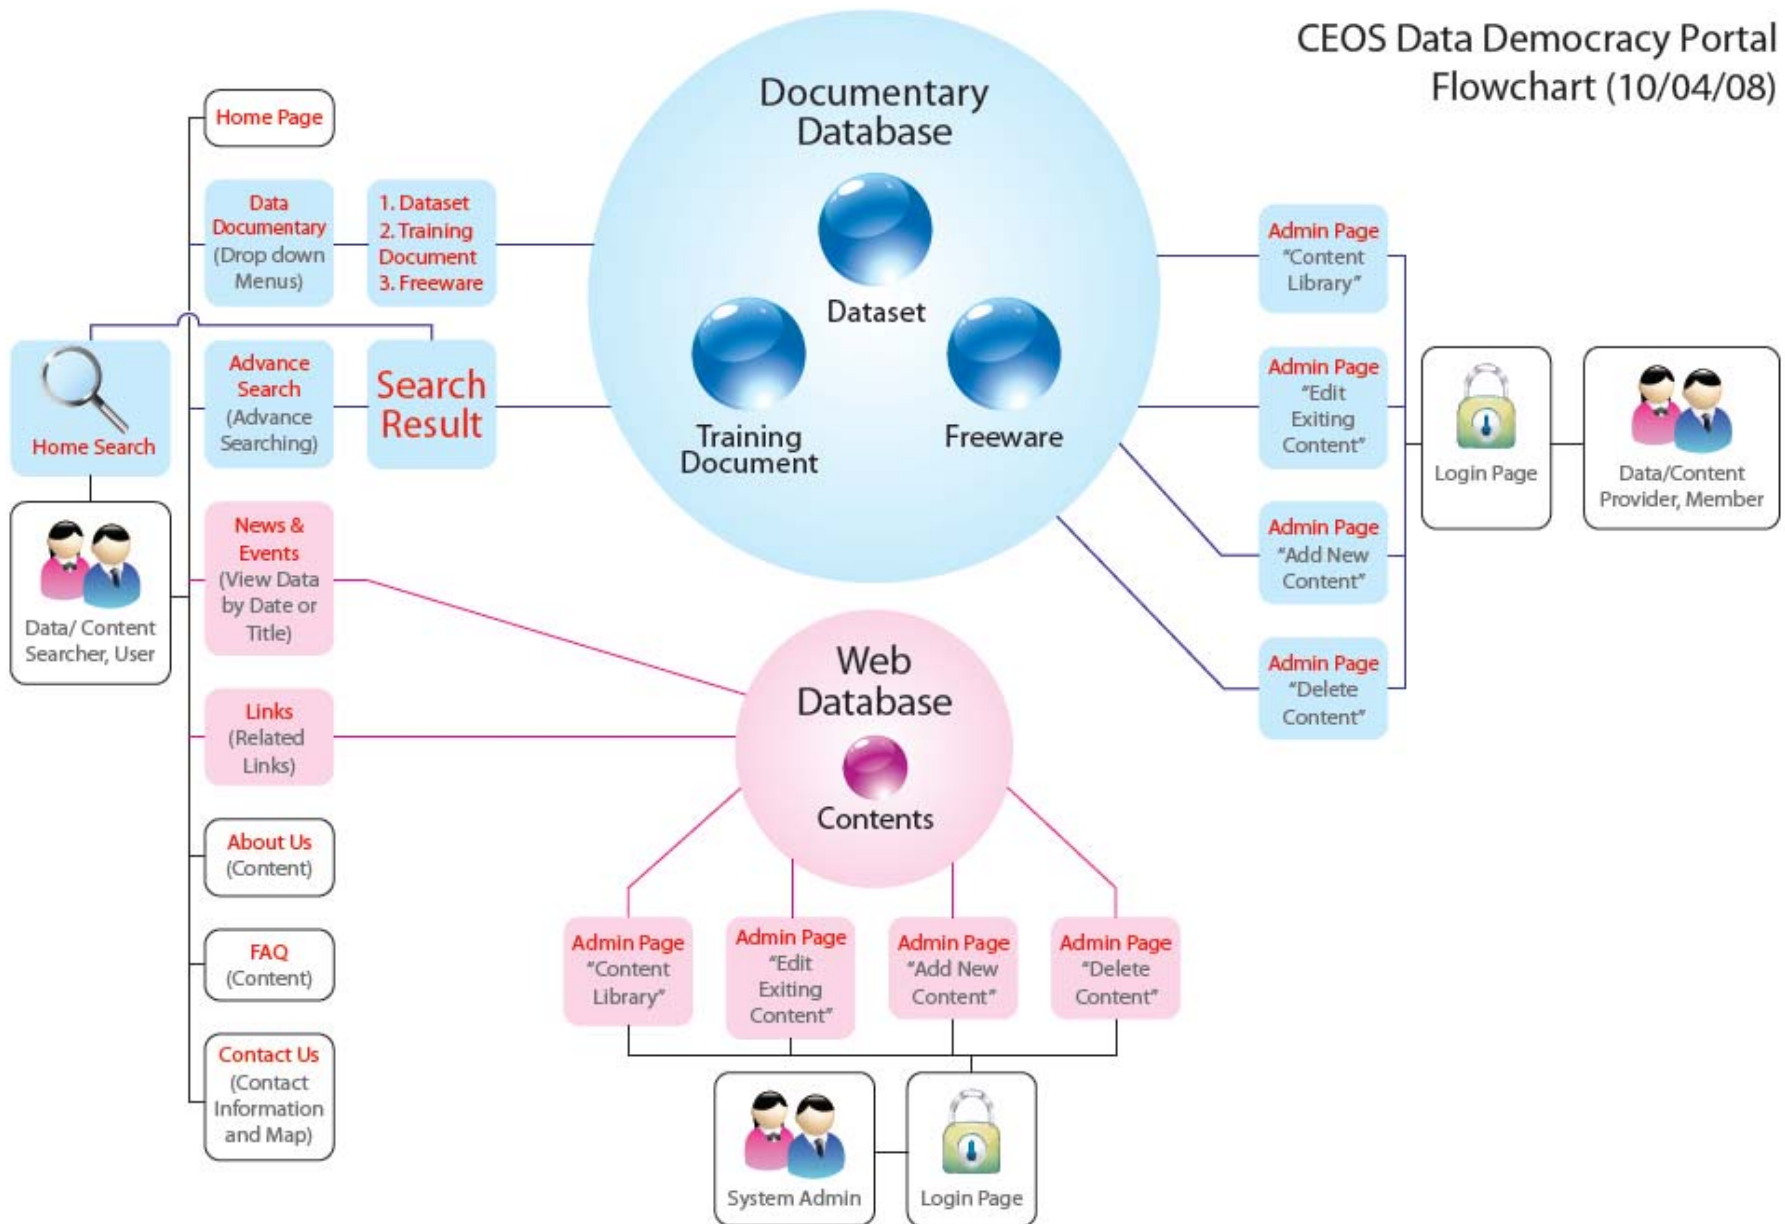

Portal Design Idea

- Put all accumulated product in place for an easy access
- By using a search engine which can initially extract product's keywords, thus, users could easily find the data/ documents/ software that they look for
- Not contain the actual image in a server but the linkage
- Webmaster could update the list of products at anytime when we have a new product comes to the community
- A full right of products still belongs to providers

Portal Structure

CEOS Data Democracy Portal
Flowchart (10/04/08)

What do we need from the provider?

- Request “keywords” from products’ providers using as inputs for search engine

Sample

- Dataset
 - Name of satellite
 - Abstract/ description
 - Coverage area
 - Acquisition date
 - Online linkage
 - Application
 - Distributor/ Product Owner

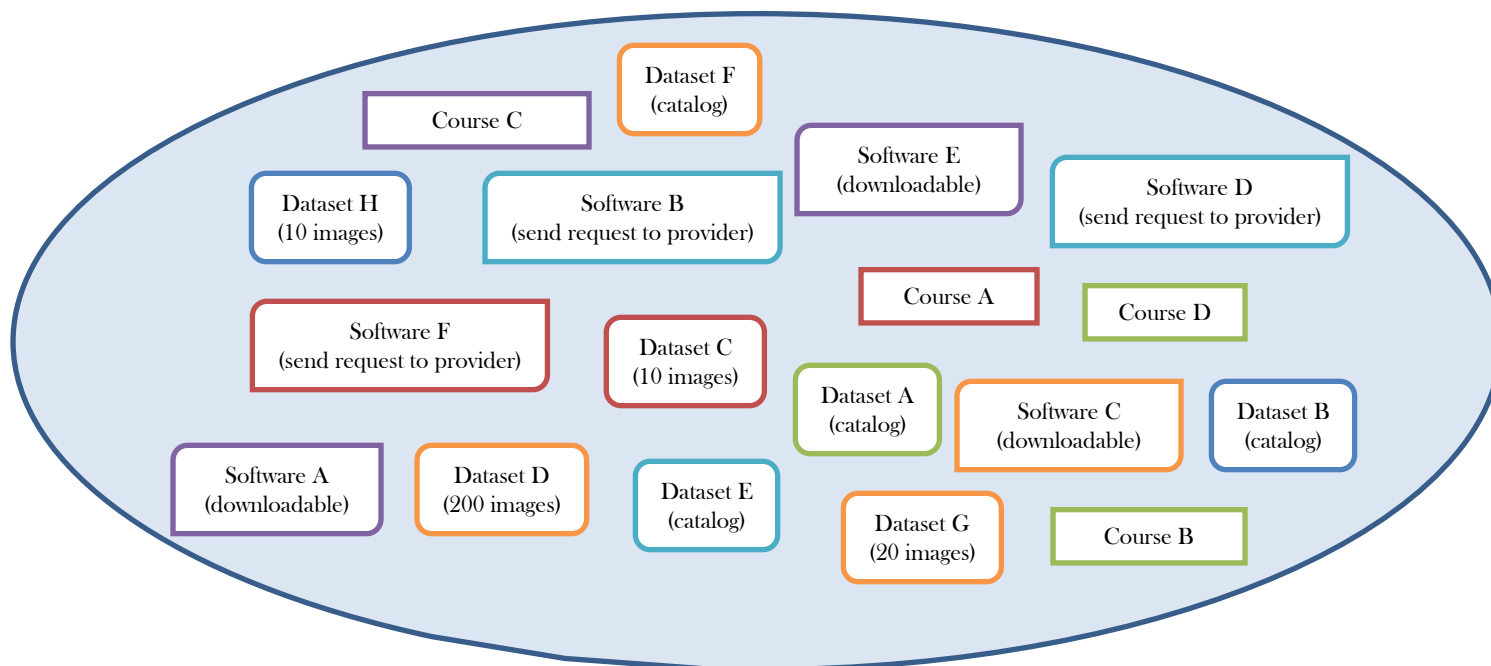

Sample of demand and supply

- **User side**

- Landsat data
- 2007
- China

- **Provider side**

- 3 providers in the program
- Both catalog and images
- Different coverage and period

Search Engine Process (backbone)

Extract level 1 : Using 1 keyword

Landsat

Extract level 1 : Using 2 keywords

Landsat 2007

Extract level 1 : Using 3 keywords

Landsat 2007 China

User Viewing Page

- We found 2 linkages of
Landsat/ 2007/ China

Dataset C
(10 images)

❖ *USGS*

Landsat 5 MSS TM

Earthquake in China, Wenchuan county

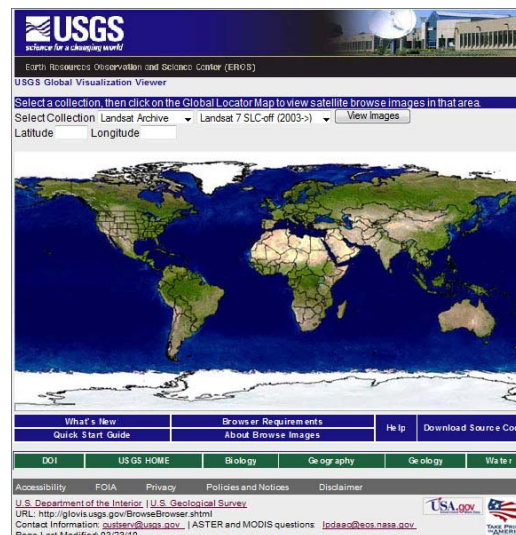

Dataset F
(catalog)

❖ *USGS Global Visulation Viewer: GloVis*

Landsat 7 ETM+
