

FCT requests to SIT 1

- Availability of key supporting systems to be clarified by relevant agencies
 - 30m resolution is the useful limit for FCT; coarser data is not useful
 - PALSAR data for NDs WTW at 25m or better
 - High resolution radar (COSMO/TERRASAR) data for VS studies
 - Additional optical < 30m contributions
- An undertaking for best efforts response to the expanded acquisition strategy for 2010
 - Initial 7 NDs repeated [mid-2010 campaign]
 - Plus as new NDs: Peru, Colombia, DR Congo, Sumatra [mid-2010]
 - Further REDD countries (UN-REDD and Worldbank's FCPF) coverage very welcome [2011+]
 - Priority of emissions estimates demonstration
 - Effort on new NDs should not compromise this

FCT requests to SIT 2

- Support development by the CEOS FCT participants of: A CEOS Strategy Report on continuity and coverage plans year by year for 2010 – 2015 using public good data sources
- CEOS & SIT Chairs asked to convene a small study to consider institutional arrangements for management of the CEOS role in supporting FCT development and expansion
- Support by CEOS agencies within their national GEO frameworks in supporting the *Global Forest Monitoring Network* initiative and making linkages to national funding processes for REDD
 - GFMN information event at GEOSEC
 - Briefing Ministerial representatives

FCT requests to SIT 3

- Request SIT Chair to seek clarification from GEO Ministerial TF and SEC regarding expectations on FCT for Ministerial showcase
