

## **CNES contribution to GEO FCT (1/2)**

### ***Data to be provided over Congo Basin countries***

- ***Very high resolution SPOT national covers (2.5m-10m) with a high geometric precision provided and used as a cartographic reference***
- ***Historical Landsat covers (1990, 2000, 2005, 2010) precisely orthorectified using the SPOT5 HRS cartographic reference + SRTM***
- ***SPOT 10-20m acquisitions 2010-2015 over the forested areas***

## **CNES contribution to GEO FCT (2/2)**

- **Considered Congo Basin countries are :**
  - ◆ **Gabon, RDC, RCA, Congo, Cameroon, Burundi, Rwanda, South of Tchad, Equatorial Guinea, Sao Tomé**
- **Spot Image still working on 2010-2015 acquisition plan feasibility (on-board registration only & cloudy areas!)**
- **A specific REDD license will allow any “REDD user” to download and use the SPOT data provided through this programme.**
- **A REDD user is a non profit organization involved in REDD thematics**
