

Committee on Earth Observation Satellites

Data Coordination Team (DCT) Report

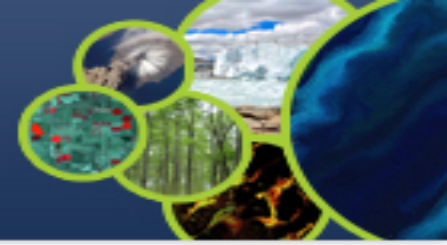

Laura Frulla CONAE

WGDisasters-17 Meeting

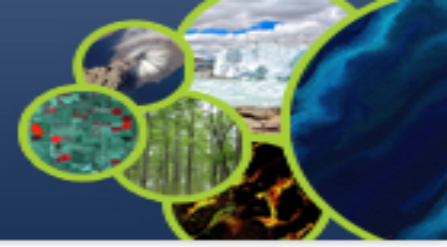

Virtual Meeting

15 – 17 March 2022

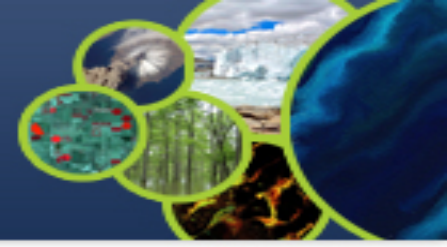

- Reports received in 2021 still in process:
 1. Virunga volcanoes : the report was received and approved by ASI and CNES who renewed the quota
 2. Icelandic volcanoes : the report was received and approved by ASI and CNES who renewed the quota
 3. Southern Andes volcanoes : the evaluation was done, but some clarifications are expected by ASI prior to quota renewal CNES agrees to renew the quota
 4. Volcano Demonstrator : the report was expected late 2021

- Reports expected in 2022 :

1. Kamchatka kuriles volcanoes (July)
2. China Eathquakes (December)
3. Hawaii volcanoes (December)
4. Etna volcanoes (July)
5. Campi Flegrei/Vesuvius volcanoes (July)
6. Marmara Western North Anatolian fault (April)

- Report provision improvement.
 - We should benefit from the new GSNL governance (as the DCT Mngr will be part of the Mngt board) to make more seamless the process of obtaining the report in time, as it is important for agencies providing quotas to have a smooth prevision of what they have to procure (w/o cost for the GSNL users...).
