

WGISS Chair Report

Tom Sohre, USGS
Agenda Item A.4
WGISS / WGCV Joint Meeting
15 & 18 October 2024
Sioux Falls, South Dakota, USA

*4-7 October 2022, Tokyo, Japan
Hosted by JAXA*

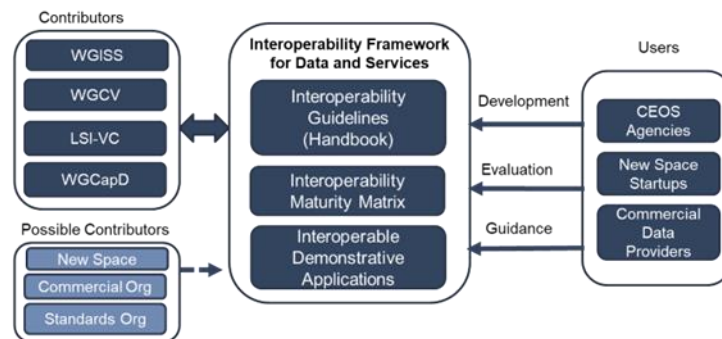

Areas of Collaboration:

- CEOS Cal/Val Portal Opportunities for linkage.
- Status of ARD Activities and linkage to WG activities.
- Data Quality Indicators and the Data Management and Stewardship Maturity Matrix.
- Interoperability Framework Concept.

2024 Joint Meeting Objectives

- ❖ Interoperability ... Handbook Approach, Semantics/Vocabulary Factor, WGCV leadership for Quality Factor,
- ❖ Maturity Matrices ... WGCV Maturity Matrix, WGISS Data Mgmt. / Stewardship Maturity Matrix, Future Interoperability Maturity Matrix
- ❖ CEOS-ARD ... 2024 CEOS-ARD Strategy and support from WGISS / WGCV
- ❖ Tools and Services ... CEOS Analytics Lab, WGCV Cal/Val Portal, WGISS Connected Data Assets
- ❖ Commercial Sector Engagement strategy
- ❖ General Information Sharing and Collaboration

**4-7 March 2024, Sydney, Australia
Hosted by GA and CSIRO**

Areas of Discussion:

- Roadmap for Data Interoperability and Use Interest Group Activities
- Geospatial Standards (ISO, OGC, STAC)
- AI/ML Demonstrators Projects
- Jupyter Notebooks in Digital Earth and CAL
- CEOS Data Access including FedEO and IDN
- Collections Management Introduction
- Overview of Biodiversity Initiative

- Endorsement of Archive Technologies White Paper
- (45) Actions Identified (29-complete, 11-IP, 5-Open)

❖ Review Accomplishments and Work in Progress

- Evolution of FedEO/IDN for implementing emerging interfaces (i.g. STAC)
- STAC EO Collection and Granule Discovery Best Practices
- Connected Data Assets Website Updates
- EO Data Collections Management and Governance White Paper
- Heritage Dataset Recovery (AVHRR)
- AI/ML White Paper
- Jupyter Notebooks Best Practice
- Interoperability Handbook Version 2.0

Working Group on Information Systems and Services (WGISS) promotes collaboration in the development of systems and services that manage and supply Earth observation data:

*To enable Earth observation data and information to be more **accessible and usable** to both data providers and data users world-wide through international coordination.*

*To foster **easier exchange** of Earth observation and related data and information to meet the requirements of users and data providers.*

*To foster the development of **best practices** and encourage the development of **interoperable services** that exploit space-borne Earth observation data.*

*To enhance the **complementarity, interoperability and standardization** of Earth observation data and information management and services with other types of geospatial data such as in situ data*

PRESERVE AND KNOW THE PAST

UNDERSTAND THE PRESENT

SHAPE AND ENABLE
THE FUTURE

Develop Vision for Ongoing Activities

- Efficient and Effective Communications w/ Stakeholders (Website, Social Media, Whitepapers, Best Practices)
- Opportunities for collaboration: CEOS WG's, GEO, Commercial Sector, Standards bodies
- Challenges and Best Practices Managing Data in Cloud
- Authentication and Authorization approaches
- Data compression algorithms
- Traceability and provenance
- Technology Exploration objectives

***Working Group on Information Systems and Services (WGISS)** promotes collaboration in the development of systems and services that manage and supply Earth observation data:*

*To enable Earth observation data and information to be more **accessible and usable** to both data providers and data users world-wide through international coordination.*

*To foster **easier exchange** of Earth observation and related data and information to meet the requirements of users and data providers.*

*To foster the development of **best practices** and encourage the development of **interoperable services** that exploit space-borne Earth observation data.*

*To enhance the **complementarity, interoperability and standardization** of Earth observation data and information management and services with other types of geospatial data such as in situ data*

PRESERVE AND KNOW THE PAST

UNDERSTAND THE PRESENT

SHAPE AND ENABLE
THE FUTURE

- ❖ Communication and Collaboration is key to our success.
- ❖ Interoperability will not occur in isolation; It will require collaboration, change, and compromise.
- ❖ Our stakeholders are being challenged by rapidly increasing EO data volumes.
- ❖ Technology is constantly evolving, and this rapid evolution can be challenging to keep up with.
- ❖ We learn from each other's successes (and challenges) ... sharing is important.
- ❖ Many of our activities are not “done” ... we evolve as we learn more.
- ❖ It can be valuable to incorporate lessons learned from non-CEOS organizations (commercial engagement).
- ❖ As a best effort organization, it is necessary to be strategic and efficient in our activities

PRESERVE AND KNOW THE PAST

UNDERSTAND THE PRESENT

SHAPE AND ENABLE
THE FUTURE

WGISS Organizational Structure

WGISS Principals

AEM: Adrian Guzman
CAS/AIR: Ziyang Li
CAS/NRSCC: Chuang Liu
CNES: Pierre-Marie Brunet
CONAE: Homero Lozza
CSA: Paul Briand
CSIRO: Matt Paget
DLR: Katrin Molch
EC: Daniel Quintart
ESA: Mirko Albani
EUMETSAT: Michael Schick
GA: Simon Oliver
GISTDA: Panu Srestasathien
INPE: Lubia Vinhaes
ISRO: Nitant Dube
JAXA: Makoto Natsukawa
NASA: Katie Baynes
NOAA: Kenneth Casey
NSO: Raymond Sluiter
ROSCOSMOS: Tamara Ganina
UKSA: Michelle Odgers
USGS: Tom Sohre
VSNC: Vu Anh Tuan

Chair Tom Sohre, USGS
Vice-Chair Nitant Dube, ISRO
Secretariat Libby Rose, Symbios for USGS

Data Preservation and Stewardship Interest Group: Mirko Albani, ESA

Data Interoperability and Use Interest Group: Nitant Dube, ISRO

Data Discovery and Access Interest Group: Damiano Guerrucci, ESA

- **IDN** Michael Morahan, NASA
- **FedEO** Damiano Guerrucci, ESA
- **CWIC** Minnie Wong, NASA

Technology Exploration Interest Group: Yousuke Ikehata, JAXA

THANK YOU!
